Acknowledgements

The Information Services Division of the Bureau of Drug Surveillance (BDS), formerly the Bureau of Dangerous Drugs, compiles data from case reports received from police officers of the law enforcement agencies and from health professionals of the health industry and the Health Protection Branch.

We gratefully wish to acknowledge the co-operation of the previously mentioned parties, who submitted completed case reports on a consistent and timely basis and whose significant contributions made this publication possible.

Comments are requested, particularly on the aspects that the readership would like to see addressed in this report. Information and comments on this report may be addressed to:

**Chief,
Information Services Division
Bureau of Drug Surveillance
Ottawa, Ontario
K1A 1B91**

Remerciements

La division des services d'information du Bureau de la surveillance des médicaments (BSM), autrefois Bureau des drogues dangereuses, réunit des données à partir des fiches d'observation soumises par les autorités policières, les professionnels de la santé et par ses propres inspecteurs.

Nous tenons à remercier sincèrement les collaborateurs précités qui soumettent, de manière constante et opportune, des fiches d'observation dûment remplies et qui, par leur contribution, ont permis la publication du présent rapport.

Nous aimerions recevoir vos commentaires, particulièrement ceux qui concernent les points dont vous aimeriez que nous parlions dans le présent rapport. Les informations et les commentaires peuvent être envoyés à l'adresse suivante :

**Le chef,
Division des services d'information
Bureau de la surveillance des
médicaments
Ottawa (Ontario)
K1A 1B9**

Background

The Narcotic, Controlled and Restricted Drug Statistics have been produced by the Bureau of Drug Surveillance (BDS), formerly the Bureau of Dangerous Drugs, under various formats and titles since the 1940s. The data sources for these **operational-based statistics** were usually case reports, as the information from these was required for program operations and reporting to international agencies. The content, method of processing, presentation and format of data have undergone changes over the years, most recently for the 1980 calendar-year report.

The 1980 report included extensive revisions of detail in the legal offense tabulations, introduction of five-year data and the update of data for preceding years. To process more of the reports received after the calendar year and to increase the degree of coverage, the **cutoff** date for statistical processing was extended by three months, from the end of March to the end of June.

Except for changes to the content of the report, the method of processing, format and detailed presentation of data has remained, essentially, unchanged since the 1980 report. The changes to content were as follows:

- (i) Cannabis statistics on the disposition of charges and convictions have not been compiled since the 1985 reporting period due to the high volume of data and economic restraint measures. Other related indicators on cannabis drug offenses can be obtained from the Canadian Center for Justice Statistics, Statistics Canada.
- (ii) Statistics on known drug users have had low reliability. They have been excluded.

Généralités

Depuis les années 40, les Statistiques concernant les stupéfiants, les drogues contrôlées et les drogues d'usage restreint ont été produites par le Bureau de la surveillance des médicaments (BSM), autrefois Bureau des drogues dangereuses, sous des formes et des titres différents. Pour établir ces **statistiques fondées sur les opérations**, on recueillait habituellement des données provenant de fiches d'observation, dont l'information était nécessaire à la prestation des programmes, et rapporté aux organisations internationales. Au cours des années, le contenu, la méthode de traitement, la présentation et la disposition des données ont subi certains changements, le plus récemment en 1980.

Dans le rapport de 1980, on retrouvait en effet des révisions détaillées de la mise en ordre des données concernant les infractions, l'introduction de données calculées pour une période de cinq ans ainsi qu'une mise à jour des données des années précédentes. Afin de pouvoir traiter un plus grand nombre de fiches reçues après l'année civile en cours et d'élargir la portée des données, on a reporté la **date limite** de traitement des statistiques de trois mois, soit de la fin de mars à la fin de juin.

À l'exception des changements suivants, la méthode de traitement, la forme et la présentation détaillées des données n'ont pas été modifiées depuis le rapport de 1980. Voici les quelques changements qui ont été apportés au contenu :

- (i) Depuis le rapport de 1985, dans le cas du cannabis, les statistiques concernant l'aboutissement des accusations et des condamnations n'ont pas été établies en raison du volume important de données reçues et de mesures de restriction financière. On peut obtenir d'autres indicateurs des infractions liées au cannabis par l'entremise du Centre canadien de la statistique judiciaire (Statistique Canada).
- (ii) Comme les statistiques relatives aux consommateurs des drogues reconnus sont peu fiables, elles ont été exclues de la partie principale du rapport.

Report Contents and Data Sources

This report is divided into four sections. The following is a summary description of each section. Section one, **Legal Statistics**, contains information on disposition of **charges** and **convictions** under the narcotic, controlled and restricted drug legislation. Section two, **Drug Seizures Statistics**, contains information on the number and quantities of drugs seized. Drugs seized also serve as evidence exhibits for the disposition of above charges and convictions. Data for these sections were extracted from the Drug Offense and Disposition Report, submitted to BDS by all enforcement agencies in Canada. All enforcement agencies are required to submit these reports so that the Minister of Health Canada can fulfil departmental responsibilities in the disposition of drugs and in the provision of related statistical information to enforcement and judicial programs and international agencies.

The third and fourth sections contain information on the **diversion** of licit narcotic and controlled drugs from the health care system for non-medical use. The **Diversion of Pharmaceutical Drugs through Thefts and Other Losses** statistics section contains information on thefts in the forms of break and entry, armed robbery, snatch and grab, pilferage and those losses that were not explained and losses that occurred during transit of drugs. As required, and as stipulated in the regulations of drug legislation, the Narcotic and Controlled Drug Loss and Theft Reports are submitted to BDS by health professionals and HPB inspectors.

The fourth section, **Diversion of Prescription Drugs through Forged Prescriptions**, contains information on written, altered and verbal forged prescriptions and whether they were filled or not. Data for this section were extracted from the Forgery Reports received **voluntarily from pharmacists** and HPB inspectors.

Contenu du rapport et sources des données

Le présent rapport est divisé en quatre sections. Voici une brève description de chacune d'entre elles. La première section, **Statistiques judiciaires**, renferme des informations sur le résultat des **accusations** et les **peines** imposées selon les lois concernant les stupéfiants, les drogues contrôlées et les drogues d'usage restreint. La deuxième section, **Statistiques sur les saisies de drogue**, contient de l'information sur le nombre et quantité de drogues saisies. Ceux-ci servent également comme objet de preuve lors des dispositions d'accusations et de convictions. Les données de cette section sont tirées des rapports sur les infractions et dispositions des drogues, soumis au BSM par toutes les autorités policières du Canada. Toutes les autorités policières doivent soumettre ce rapport pour que le ministre de Santé Canada puisse s'acquitter des responsabilités de son ministère pour ce qui est de disposer des drogues et de fournir l'information ou statistiques nécessaires aux programmes judiciaires et d'application de la loi, ainsi qu'aux organisations internationales.

Les troisième et quatrième sections renferment des informations sur les stupéfiants et les drogues contrôlées licites **détournés** du réseau médico-hospitalier à des fins non médicales. La section portant sur le **détournement des médicaments par vols et autres pertes** renferme des données sur les vols, soit les effractions, les vols à main armée, les vols à la sauvette, le chapardage, les pertes inexplicables et les pertes au cours du transport. Conformément au règlement des lois régissant les drogues, les rapports sur les pertes et les vols de stupéfiants et de drogues contrôlées doivent être soumis au BSM par les professionnels de la santé et les inspecteurs du Bureau.

La quatrième section, **Cas signalés de détournement de médicaments par contrefaçons d'ordonnances**, comprend des informations sur les fausses ordonnances écrites, modifiées et verbales, et laisse voir si elles ont été exécutées ou non. Les données de cette section proviennent des rapports sur les contrefaçons rapportés **volontairement par les pharmaciens** et les inspecteurs de la D.G.P.S..

Limitations of Data

Late Reporting

In interpreting the data it must be remembered that the data received in the calendar year are preliminary and are subject to upward revision after the date of first publication. In subsequent years these data are revised to reflect the latest information available. Differences between currently available data and final data were high for drug seizures (averaging 30% for 1986-1988), for charges (averaging 22% for 1987-1989) and for convictions (20%). In general, the revisions were low for thefts and losses (up to 2%) and higher for forgeries (12%). This difference may be due to the voluntary nature of forgery reporting.

The need for these upward revisions stems from the problems associated with late reporting (because not all reports are received before the **cutoff** date of June 30), as well as the nature of program operations. There are many reasons for late reporting. Some reports are held in courts until final conclusion of cases or for some other administrative need; some cases are found or reports are submitted from a previous year upon an audit or an inspection of an institution.

The above differences can be significant for drug seizures, charges and convictions as well as forgeries data when **preliminary**, incomplete year numbers are compared to **final**, more complete numbers for previous years. To correct this, preliminary numbers can be adjusted as **estimates** based on above percentages. It should be noted that estimates (forecasted numbers based on past experience) are rough approximate numbers, but should be correct (equal to final numbers) within 5%.

Limites des données

Rapports soumis après les délais prévus

Lorsqu'on interprète les données, on doit se rappeler que celles qui sont reçues pendant l'année civile sont préliminaires et qu'elles font l'objet d'une révision à la hausse après la date de la première publication. Au cours des années suivantes, ces données sont révisées afin de refléter les informations les plus récentes dont on dispose. L'écart entre les données préliminaires et définitives est élevé pour ce qui est des saisies (moyenne de 30 % pour 1986-1988), des accusations (22 % pour 1987-1989) et des convictions (20%). En général, les changements sont peu marqués pour les vols et pertes (2 %), mais plus prononcés pour les contrefaçons (12 %). Cette différence tient peut être au fait qu'il n'est pas obligatoire de signaler les contrefaçons.

Les rapports soumis après les délais prévus (ils n'arrivent pas tous avant la **date limite de saisie annuelle des données**, soit le 30 juin) ainsi que la nature du fonctionnement des programmes occasionnent ces révisions à la hausse. Les raisons des retards s'avèrent assez nombreuses. Certains rapports sont retenus par la Cour jusqu'à ce qu'on connaisse l'issue du cas ou pour d'autres raisons administratives. La vérification ou l'inspection d'un établissement permettent de repérer certains cas ou d'obtenir certains rapports d'une année antérieure.

Ces écarts peuvent se révéler importants en ce qui concerne les données relatives aux saisies, aux accusations et condamnations, ainsi qu'aux contrefaçons, si on compare les chiffres **préliminaires** aux chiffres **définitifs** des années précédentes. Voilà pourquoi les chiffres préliminaires ont été rajustés par **estimation**. Compte tenu des variations en pourcentage observées entre les chiffres préliminaires et définitifs pour les périodes antérieures, ces estimations devraient être exactes à 5 % près.

Operational Sources

The data are extracted from case reports and retrieved from information systems set up to support both program operations and statistical information reporting. As in other similar reporting systems, these statistics may be influenced by operational priorities of the contributing parties. For example, higher resource assignment priority placed on cocaine may mean lower emphasis on other drugs, which may result in an increase in the number of reports for cocaine. In addition, factors such as reporting consistency, quality of completion and timing in submission of reports are influenced by administrative procedures and constraints of the parties involved.

Coverage and Quality

Because the legal drug seizure and diversion statistics are based on reported information of known drug abuse-related criminal or illicit activities that came to the attention of the law enforcement agencies and health care professionals, the **findings** are a **subset** of all of these activities in Canada.

Because an extensive review of reporting practices and validation of data has not been conducted, it is difficult to specify the degree of coverage, the rate (if any) of under-reporting or the error rate within the data. For example, there may be some cases in which police do not report a drug charge, particularly when drugs or assets seizures were not involved. Some drug diversion cases are influenced by detection and/or investigative techniques (hit/miss ratio), which will affect the statistics. This is particularly true for such cases as pilferage or forgeries, which may represent an even smaller subset compared to other types of diversion cases.

Sources opérationnelles

Les données sont tirées de fiches d'observation et de systèmes d'information qui visent à étayer tant les opérations des programmes que les statistiques. Comme c'est le cas pour d'autres formules semblables, l'ordre de priorité des collaborateurs peut influencer sur les statistiques. Si les ressources attribuées dans le cas de la cocaïne sont plus considérables, par exemple, on accordera peut-être moins d'importance aux autres drogues, d'où un accroissement possible du nombre de rapports sur la cocaïne. De plus, les procédures et les contraintes administratives des parties intéressées peuvent également influencer sur la régularité dans la présentation des rapports, la qualité de l'exécution et le respect des délais.

Étendue et qualité

Comme les statistiques concernant les affaires judiciaires et les détournements sont fondées sur des informations relatives à des activités criminelles ou illicites connues qui sont signalées aux autorités policières et aux professionnels de la santé, les **résultats** ne représentent qu'un **sous-ensemble** de toutes les activités au Canada.

On n'a pas procédé à un examen détaillé des pratiques de déclaration de cas ni du mode de validation des données; voilà pourquoi il est difficile de déterminer l'étendue des données obtenues ainsi que le taux de sous-déclaration ou d'erreur (le cas échéant). Il se peut, par exemple, que la police ne signale pas une accusation portée dans une affaire de drogues, particulièrement lorsqu'elle ne saisit pas de drogues ou de biens. Les techniques de détection ou d'enquête (rapport réussites/échecs) peuvent influencer sur certains cas de détournement de drogues, et cela se répercute sur les statistiques. Cela s'avère particulièrement vrai dans le cas du chapardage et des contrefaçons, qui peuvent constituer un sous-ensemble encore moins important, par comparaison à d'autres genres de détournement.

Criminal Code Offences

Data on convictions for **related** drug offenses under the Criminal Code (federal, but separate legislation) are not included here. An unknown portion of all of these convictions, accounting for less than 2% of the overall total of federal drug legislation, is reported to BDS by police forces, mostly when drug seizures are involved. Conspiracy (particularly conspiracy to traffic) accounts for the majority of Criminal Code drug-related offenses.

Conclusion

Limitations

If the previously stated limitations are taken into consideration, then analysis of overall patterns, trends and inter-group comparisons should not be impeded. However, caution is recommended in the analysis of **detailed breakdowns**, in interpreting counts as **absolute** or **finite measures** (low significance) and comparing **preliminary and final year data**.

Indicators of Drug Use

As previously noted, these statistics are only measures of society's changing response to illicit drug involvement and use in Canada.

These **operational-based statistics** are influenced by different activities of the parties involved, such as periodic program against drug abuse in a certain region or neighbourhood, or increased surveillance and controls over a targeted drug. The activities themselves may be further influenced by any or all of the following factors: drug distribution, supply and degree of controls or reduction activities in place; drug abuse, addiction and associated health risks and social problems; patterns in social acceptance, popularity; and, finally, drug demand and actual drug use. Measuring this response can at most provide some indirect (not actual) indicators of drug use.

Infractions visées par le Code criminel

Le présent rapport ne comprend pas l'analyse des accusations et des condamnations concernant les infractions **liées** aux drogues visées par le Code criminel (une loi fédérale mais distincte). Une part indéterminée des condamnations prononcées en vertu du Code, qui comptent pour moins de 2 % de la totalité des condamnations imposées conformément à la législation fédérale sur les drogues, est signalée au BSM par les autorités policières, principalement lorsque des drogues sont saisies. Les complots (particulièrement le complot en vue de faire trafic) représentent la majorité des infractions liées aux drogues qui tombent sous la coupe du Code criminel.

Conclusion

Limites

Les limites mentionnées plus haut ne devraient pas empêcher l'analyse des tendances globales et les comparaisons entre les groupes. Il faut cependant faire preuve de prudence lorsqu'il s'agit d'analyser la **ventilation détaillée** des données, d'interpréter les dénombrements (**ce ne sont pas des mesures absolues ni définies**), et de comparer les données **préliminaires** et les **données définitives d'une année**.

Indicateurs de l'usage des drogues

Comme nous l'avons déjà mentionné, les statistiques ne servent qu'à mesurer l'évaluation de la réaction de la société (extrant) face à l'utilisation de drogues illicites au Canada (intrans).

Les diverses activités des parties intéressées, comme les programmes de lutte périodique contre la toxicomanie menés dans une région ou dans un quartier en particulier, ou encore une surveillance accrue exercée quant à une drogue donnée, peuvent influencer sur ces statistiques qui sont **fondées sur les opérations**. Un ou plusieurs des facteurs suivants peuvent avoir un effet sur les activités suivantes : distribution des drogues, sources d'approvisionnement, degré de surveillance, activités de réduction. Au même titre, citons la toxicomanie ainsi que le risque pour la santé et les problèmes sociaux qui y sont associés, les tendances au plan de l'assentiment de la société et de la popularité d'une drogue, et, finalement, la demande à l'égard d'une drogue et l'usage que l'on en fait réellement. La mesure de cette réaction ne peut fournir au mieux que des indicateurs indirects (pas forcément exacts) de l'usage des drogues.

DRAFT

SECTION I

LEGAL STATISTICS

STATISTIQUES JUDICIAIRES

Legal Statistics

The Minister of Health Canada is responsible for the disposition of drugs seized by police forces under the *Narcotic Control Act* and Parts III and IV of the *Food and Drugs Act*. To fulfill this responsibility, the Minister requires police forces to report details of cases in which offences have been committed under these statutes and their respective regulations.

To properly interpret the information contained in these tables, the following points should be noted:

- The date of disposition of a case is used to determine the year in which it is recorded in the statistics.

- The age upon the date of arrest is used as the criteria for inclusion in tables dealing with age groups.

- In some cases when one sentence is imposed for more than one drug, the sentence will be recorded in the statistics for each drug.

- In some cases multiple penalties are imposed (e.g. two years jail and \$1,000, six months jail or \$200). The *Drug Offence Report* does not, in most cases, identify the final sentence option chosen or imposed. As such a priority ranking of jail over fines over probation is used. Although this eliminates multiple counting of individual convictions, it does introduce a few limiting factors when interpreting some of the tables.

- Multiple doctoring charges were changed in 1986 from the *Narcotic Control Regulations* (Section 3(3)) to the *Narcotic Control Act* (Section 3.1(1)). Similar charges have been introduced to the *Food and Drugs Act* (Section 33(1)).

Statistiques judiciaires

Le Ministre de Santé Canada a pour responsabilité la disposition des drogues saisis par les agents de police en vertu de la *Loi sur les stupéfiants* et des parties III et IV de la *Loi des aliments et drogues*. Afin de s'acquitter de cette responsabilité, le Ministre exige que les corps policier fassent des rapports détaillés sur les cas d'infraction à ces lois et à leurs règlements respectifs.

Pour interpréter correctement les renseignements contenus dans les tableaux, il importe de se rappeler les points suivants :

- la date du jugement d'une cause sert à déterminer l'année où cette cause est enregistrée dans les statistiques;

- l'âge du prévenu au moment de son arrestation est celui qui figure dans les tableaux présentant les groupes d'âge;

- dans certaines causes lorsqu'une peine est infligée pour plus d'une drogue, cette peine sera enregistrée dans les statistiques sous chacune de ces drogues;

- dans certains cas, des peines multiples sont imposées (ex., 2 ans d'emprisonnement et 1 000 \$ d'amende, 6 mois d'emprisonnement ou 200 \$ d'amende). Le plus souvent, le Rapport concernant une infraction aux lois sur la drogue n'indique pas quelle sentence a été finalement choisie ou imposée. C'est pourquoi les sentences sont classées dans l'ordre de priorité suivant : emprisonnement, amende, probation. La possibilité de compter plus d'une fois une même condamnation est ainsi éliminée, mais par la même occasion, des facteurs de confusion se trouvent introduits dans l'interprétation de certains tableaux; et

- les accusations pour consultations médicales multiples ont été modifiées en 1986 et font maintenant partie de la *Loi sur les stupéfiants* (article 3.1(1)) et non plus du *Règlement sur les stupéfiants* (article 3(3)). Des accusations similaires ont été incorporées à la *Loi des aliments et drogues* (article 33(1)).

Explanatory Notes

Narcotic Control Act

Section 3(1) - Possession

Section 3.1(1) - Obtaining drugs from more than one physician within a 30 day period

Section 4(1) - Trafficking

Section 4(2) - Possession for the purpose of trafficking

DRAFT

SECTION II
DRUG SEIZURES STATISTICS

Drug Seizure Statistics

All drug enforcement agencies report drug seizures on the Drug Offence and Disposition Report to the Minister of Health Canada. The Minister authorizes the disposition of seized drugs. The data is also compiled from the first of the seven copies of the report form and is reported to the international agencies.

To properly interpret this data the following points should be noted:

- The date of drug seizure is used to determine the year in which it is recorded in the statistics.

- Due to delays in reporting (data lag), the number of drug seizures reported as of June 30 by all enforcement agencies are estimated to be about 75% complete for the year reported and over 90% complete for the previous year. Although numbers can be estimated within a 5% error rate, because of the high variation in weights of seizures (eg ml, mg, ton), quantities cannot be estimated.

- It should be noted that one operational/case seizure may have many unique drug exhibits, identified as such by type (i.e. heroin, cannabis), form (e.g. gm, ml, tablets) and strength (e.g. mg, 80%). Each unique **drug exhibit** is entered as a unique record (one count), while reported multiple same drug exhibits (same form and strength) are collapsed into one exhibit.

- Due to the nature of the illicit market, many illicit exhibits are reported in a non-standard weight, form of measure or without strength. The reader is cautioned that the total quantities will include these seizures.

·In some cases the seized exhibit is not recorded in the statistics if it is not identified as a psychoactive drug or the information about it is not complete (e.g. minute amounts of unidentified substance, chemical precursors, etc.).

·In some cases where co-operative seizures are made by more than one enforcement agency, the enforcement agency reporting the seizure for disposition of charges and drugs will be counted in the statistics.

·Annual quantity variations may reflect major seizures that occurred during the year and not real changes in supply.

Drug Seizures Statistics Tables

1. Number, Quantity, and Rate of Drug Exhibits Seized, by Drug Type, Canada and the Provinces/Territories.

1.1. Number and Quantity of Drug Exhibits Seized by Major Restricted Drug, Canada and the Provinces/Territories.

1.2. Number and Quantity of Drug Exhibits Seized for Steroids and Benzodiazepines, Canada and the Provinces/Territories.

2. Number and Quantity of Drug Exhibits Seized, by Drug Type, Enforcement Agencies and Canada.

3. Number and Quantity of Drug Exhibits Seized by Drug Type, Metropolitan Areas and Canada.

TABLE 1 - Number (N), Quantity (Q in kg), and Rate per 100,000 Population (R) of Drug Exhibits Seized, with Seven Year Averages (86-92) by Drug Type, Canada and the Provinces/Territories.

Note: The number of exhibits reported as of June 30, 1995 by all enforcement agencies are estimated to be about 75% complete for 1994 and over 90% complete for 1993.

SECTIONS III AND IV

DIVERSION STATISTICS

Tables 1-8

STATISTIQUES SUR LES
DÉTOURNEMENTS

Tableaux 1-8

Diversion Statistics

For the purpose of these statistics diversion is defined as the movement of licit narcotic and controlled drugs from the health care system for non-medical use. It encompasses the following:

- theft in all forms, including break and enter, armed robbery, snatch and grab, pilferage;
- unexplained losses;
- losses during transit;
- forged prescriptions;
- verbal misrepresentation.

Diversion may occur at any point between the manufacturing or importation of the drug and its utilization by the patient.

The Regulations to the Narcotic Control Act and the Food and Drugs Act stipulate that the loss or theft of a narcotic or controlled drug must be reported to the Minister of Health Canada within ten days of discovery. Information is extracted from these reports, compiled and published as a component of the Diversion Statistics. In interpreting tables on the thefts and losses cases by drug involved, it should be noted that most cases (incidents) involve more than one drug.

Reports involving the diversion of narcotic and controlled drugs obtained by means of forged prescriptions and verbal misrepresentation are received from various sources, including HPB inspectors, but mostly, **on a voluntary basis** from pharmacists.

A reporting system has been developed to promote and facilitate the reporting of diversion by prescription forgery and verbal misrepresentation. The basis of the system is a form to be submitted by pharmacists when a successful or attempted diversion by these means is identified.

It should be noted that due to changes in reporting practices, only few cases of forgeries were reported for British Columbia in recent years.

Statistiques sur les détournements

Aux fins des présentes statistiques, le terme détournement désigne le mouvement de stupéfiants et de drogues contrôlées licites obtenus par l'intermédiaire du système de santé et destinés à des usages non médicaux. Il englobe:

- le vol sous toutes ses formes, dont le vol par effraction, le vol à main armée, le vol à la sauvette et le chapardage;
- les pertes inexplicables;
- la perte de drogues pendant leur transport;
- les ordonnances contrefaites;
- les déclarations trompeuses.

Il peut y avoir détournement à n'importe quel point entre le moment où le médicament est fabriqué ou importé, et celui où il est utilisé par le patient.

Les règlements respectifs de la Loi sur les stupéfiants et de la Loi sur les aliments et drogues stipulent que la perte ou le vol d'un stupéfiant ou d'une drogue contrôlée doit être signalé au ministre de Santé Canada dans les dix jours qui suivent la constatation. Les renseignements tirés de ces rapports sont réunis et publiés dans les statistiques sur les détournements. Lors de l'interprétation des tableaux sur les vols et pertes, selon les drogues concernées, il est bon de se rappeler que dans la plupart des cas plus d'une drogue est concernée.

Les rapports ayant trait au détournement de stupéfiants et de drogues contrôlées par fausses ordonnances et déclarations trompeuses proviennent de diverses sources, dont les inspecteurs de la D.G.P.S. et les pharmaciens, agissant **de leur propre chef**.

Un système a été mis au point afin d'encourager et de faciliter la présentation de rapports sur les détournements résultant d'ordonnances contrefaites ou de déclarations trompeuses. Ce système repose sur l'utilisation d'une formule que doivent remplir les pharmaciens témoins d'une tentative (réussie ou ratée) de détournement par ces moyens.

Il faut noter que suite aux changements dans les pratiques de présentation des rapports, seulement quelques cas de détournements d'ordonnance furent rapportés, par la Colombie-Britannique dans les années récentes.

Diversion Statistics Tables

1. Reported cases of thefts and other losses involving narcotic and/or controlled drugs
2. Number of reported thefts and other losses by narcotic drug
3. Quantities of narcotic drugs diverted in theft and other losses
4. Number of reported thefts and other losses by controlled drug
5. Quantities of controlled drugs diverted in theft and other losses
6. Number of reported prescription forgeries by narcotic drug
7. Number of reported prescription forgeries by controlled drug
8. Quantities of narcotic and controlled drugs diverted in reported prescription forgeries

Tables des statistiques sur les détournements

1. Cas de vols et autres pertes rapportés impliquant des stupéfiants et/ou des drogues contrôlées
2. Nombre de vols et autres pertes rapportés selon le stupéfiant
3. Quantités de stupéfiants détournés lors de vols et autres pertes
4. Nombre de vols et autres pertes rapportés selon la drogue contrôlée
5. Quantités de drogues contrôlées détournées lors de vols et autres pertes
6. Nombre d'ordonnances contrefaites rapportées selon le stupéfiant
7. Nombre d'ordonnances contrefaites rapportées selon la drogue contrôlée
8. Quantités de stupéfiants et drogues contrôlées détournées dans les fausses ordonnances rapportées

TABLE 1: SUMMARY OF REPORTED CASES OF THEFTS AND OTHER LOSSES INVOLVING NARCOTIC AND/OR CONTROLLED DRUGS
TABLEAU 1: CAS DE VOLS ET AUTRES PERTES RAPPORTÉS IMPLIQUANT DES STUPÉFIANTS ET/OU DES DROGUES CONTRÔLÉES
